mETH

Multichain Staked Ethereum

The Problem

Ethereum staking is not available across all blockchains

"Holding significant funds in a single liquid staking token places all the investors eggs in one basket. A fund of LST's offers a free lunch of cross-chain tokenized diversification"

The Solution

mETH

Create an index fund of liquid staking tokens

Make it available across all blockchains

Create truly decentralized governance

Enable instant withdrawals & liquidity

How It Works

mETH

Liquid Staking Tokens In

LIDO stETH + rETH ROCKETPOOL

Index Fund Token

mETH

WORMHOLE

Cross-chain messaging protocol

Create a Multichain Staked Ethereum Index Token
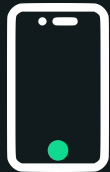

ARBITRUM   AURORA   OP Optimism
